

A!
contd.

structure, within or on said article, said article containing on it, or on outer packaging associated with said article, a list of names, at least half of the names being descriptive or connotative of the scents on or in the article, and

- (b) said article containing on it, or on outer packaging, an overall title or name for the integrated article; and
- (c) optionally, said article containing on it, or on outer packaging associated with it, an image or series of images consistent with, or in support of the article title.
- (d) optionally, said article to be used in a device for emitting the scents in sequence from said article.

62. (New) The method of Claim 61 wherein said article is reusable and said article is configured to seal said scents before the first use of said article and after the first use and subsequent uses of said article.

Respectfully submitted,

Christophe Laudemiel-Pellet, et al.
